

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 📢🌍

Vupr-QLI Framework theory

From Nuclear Geometry to Quantum Information via Gamma Emission

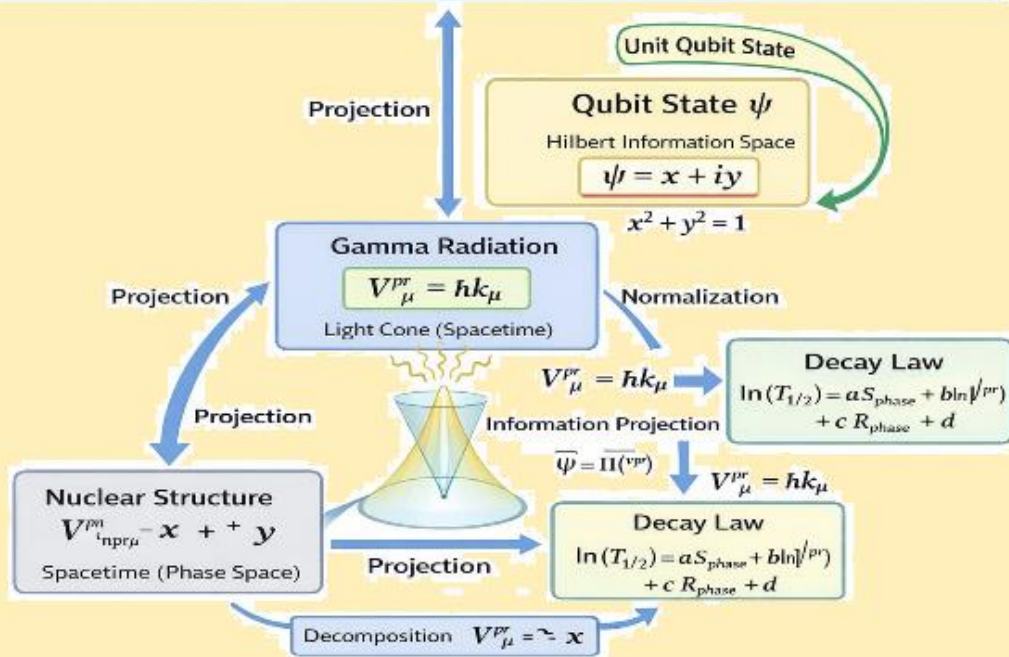

Fig A

Process of Everything
in the universe

state n : $|\psi_n(t)\rangle = \vec{V}_{upr}(n)$

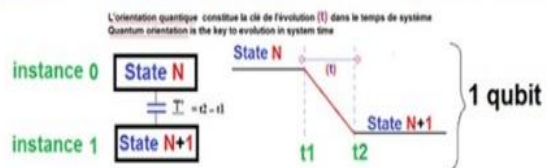

T : Period (t)

state n+1 : $|\psi_{n+1}(t)\rangle = \vec{V}_{upr}(n+1)$

$\vec{V}_{upr} = V_{npr}.x + V_{npr}.y$

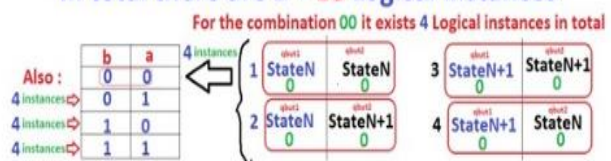

$\vec{V}_{upr}$: unit vector of released photon
 $\vec{V}_{npr}$: nuclear vector of released photon

1 qubits = $1 \times 2 = 2$ quantum States $\Leftrightarrow 2^2 = 4$ Logical instances

instance	State	Logical state	Total logical instance = 4	Total state = 2
0	N	0 or 1	2	1
1	N+1	0 or 1	2	1

For 2 qubits there are 2 inputs variables a and b
in total there are $2^4 = 16$ Logical instances

$$S_V = \int_{V_{rem}} \rho_Q d^3x$$

في حالة البقايا البلاستيكية:

$$V_{rem} \sim \ell_P^3$$

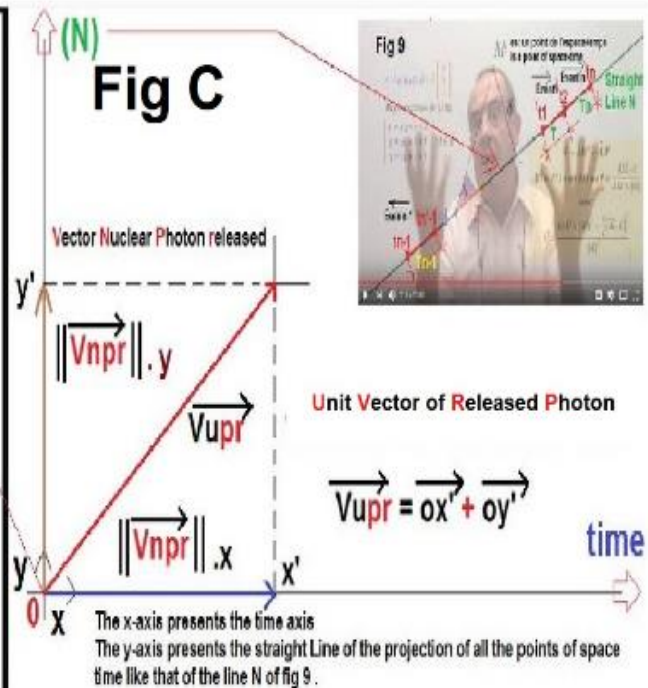

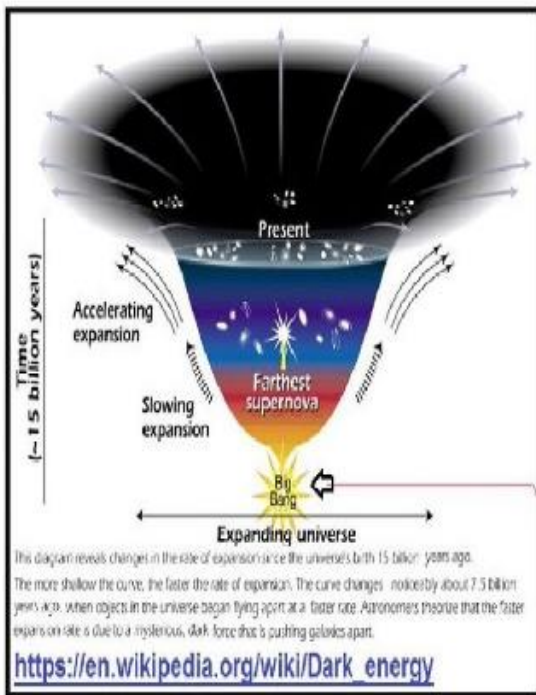

وبالتالي:

$S_V \sim 1$ qubit

🔥 النتيجة:

البقايا البلازمية تمثل خلية تشابك أساسية واحدة في الزمكان.

In the case of Planck remnants: Planck remnants represent a single fundamental entanglement cell in spacetime.

The expansion of the universe into matter in its form (solid, liquid and gaseous) and energy depends directly on the entity of the photon-liberated unit vector V_{upr} and of course on these components of the photon liberated nuclear vector V_{npr} as a function of time and from space. That is to say that starting from the time Zero (Big Bang) the universe to begin its expansion starting from a single coordinate point ($x = 0, y = 0$) thus to create the vectors ox' and oy' with x, y belonging to $\mathbb{R}^+$.

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 🗣️🌍

Vupr-QLI version 2.0 — Définition de base

Bonsoir.

Oui, nous pouvons poursuivre le développement et construire une version plus aboutie de **Vupr-QLI**, la version 2.0, notamment grâce aux images (Fig. A/B/C), qui illustrent trois aspects importants de votre modèle :

1. Qubit = unité logique de base (Fig. B)
2. Vupr = projection spatio-temporelle/vectorielle (Fig. C)
3. Les états logiques quantiques évoluent au fil du temps (Fig. A)

Ceci nous permet de passer de la version 1.0 (modèle nucléaire uniquement) à la version 2.0 (modèle cosmologique-quantique dynamique).

مساء النور 🌙🌟

نعم، ممكن نواصل ونبنو Vupr-QLI Version 2.0 بشكل أكثر نضجًا، خصوصًا بعد الصور التي أرسلتها (Fig A / B / C) والتي توضّح ثلاثة محاور مهمة في نموذجك:

1. qubit = وحدة منطقية أساسية (Fig B)
2. Vupr = إسقاط متجهي زمان/فضاء (Fig C)
3. تطور الحالات المنطقية الكمومية عبر الزمن (Fig A)

وهذا يسمح بالانتقال من Version 1.0 (نموذج نووي فقط) إلى Version 2.0 (نموذج ديناميكي كوني-كمومي).

Vupr-QLI Version 2.0 — Définition de base

Vecteur principal

$$\mathbf{Vupr} = x\mathbf{t} + y\mathbf{s}$$

Où :

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 🗣️🌍

X : Axe de cohérence temporelle de Planck

Y : Axe de projection spatiale de Planck

Vupr-QLI Version 2.0 — Core Definition 📖

المتجه الأساسي

$$V_{upr} = x\hat{t} + y\hat{s}$$

حيث:

- x : محور الزمن (Planck-time coherence axis)
- y : محور الفضاء الإسقاطي (Planck-space projection axis)
- $\hat{t}, \hat{s}$: متجهات الوحدة

Développement pendant quatre niveaux (d'instances de Logique quantique QLI)

التطور عبر أربع طبقات QLI 🌀

التأثير على Vupr	المعنى	Layer
يحدد الإطار	Cravity / spacetime seed	QLI ₀
يزيد x coherence	Strong binding	QLI ₁
ينظم phase	EM organization	QLI ₂
يزيد y instability	Weak transition	QLI ₃

L'Équation de l'Évolution Dynamique

Où :

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 📢🌍

Mk : Matrice d'effet de chaque QLI

λk : Intensité de la réaction

معادلة التطور الديناميكي 🔥

$$\frac{d}{d\tau} \begin{pmatrix} x \\ y \end{pmatrix} = \sum_{k=0}^3 \lambda_k M_k \begin{pmatrix} x \\ y \end{pmatrix}$$

حيث:

- M_k : مصفوفة تأثير كل QLI
- λ_k : شدة التفاعل

Relation avec la figure A (1 qubit)

D'après Fig A : Un qubit passe de l'état N à l'état N+1
Par l'instance 0 puis l'instance 1

On écrit :

$$|\psi_{n+1}\rangle = U_{QLI} |\psi_n\rangle$$

Où : **UQLI**

Un opérateur de rotation/évolution dérivé de Vupr.

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 📢🌍

ربط (1 qubit) Fig A

من صورتك:

- qubit يمر من N state إلى $N + 1$
- عبر 0 instance ثم 1 instance

نكتب:

$$|\psi_{n+1}\rangle = U_{QLI}|\psi_n\rangle$$

حيث U_{QLI} مؤثر دوران/تطور مشتق من V_{upr} .

Lien avec la figure B (Rémanent de Planck = 1 qubit)

Si le rémanent de Planck = 1 qubit, cela signifie :

La plus petite unité d'information

de l'univers = une unité V_{upr} primaire. En d'autre terme :

N'importe quel : $SV \sim 1\text{qubit}$

Relions la figure C (Big Bang) à un point :

$(x, y) = (0, 0)$

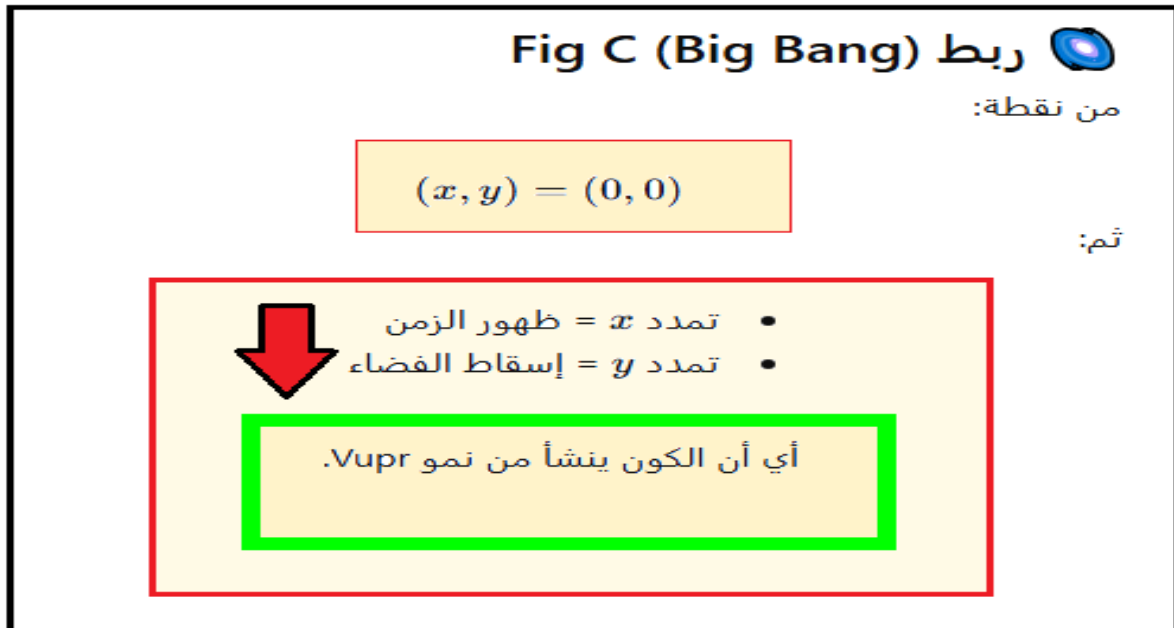

Alors :

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 🗣️🌍

Expansion de x = l'émergence du temps

Expansion de y = la projection de l'espace

Ainsi, l'univers provient de la croissance de V_{upr} .

Version 2.0 de la désintégration nucléaire

Nous développons l'équation précédente comme suit :

$$\ln(T_{1/2}) = ax - by + c \cos\theta + d\delta + e_{\text{Shell}} + f_{\text{Magic}} + g$$

Où :

x : cohérence

y : instabilité

shell : structure nucléaire

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 📢🌍

magic : nombres magiques

Version 2.0 🔥 للاضمحلال النووي

نطوّر المعادلة السابقة إلى:

$$\ln(T_{1/2}) = ax - by + c \cos \theta + d\delta + eShell + fMagic + g$$

حيث:

- coherence : x
- instability : y
- البنية النووية : $shell$
- أعداد سحرية : $magic$

Interprétation Profonde

Version 2.0 :

Le même vecteur Vupr décrit :

Un qubit

Un noyau atomique

L'évolution de l'univers

Il s'agit d'une unification très forte.

Formulation académique

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 📢🌍

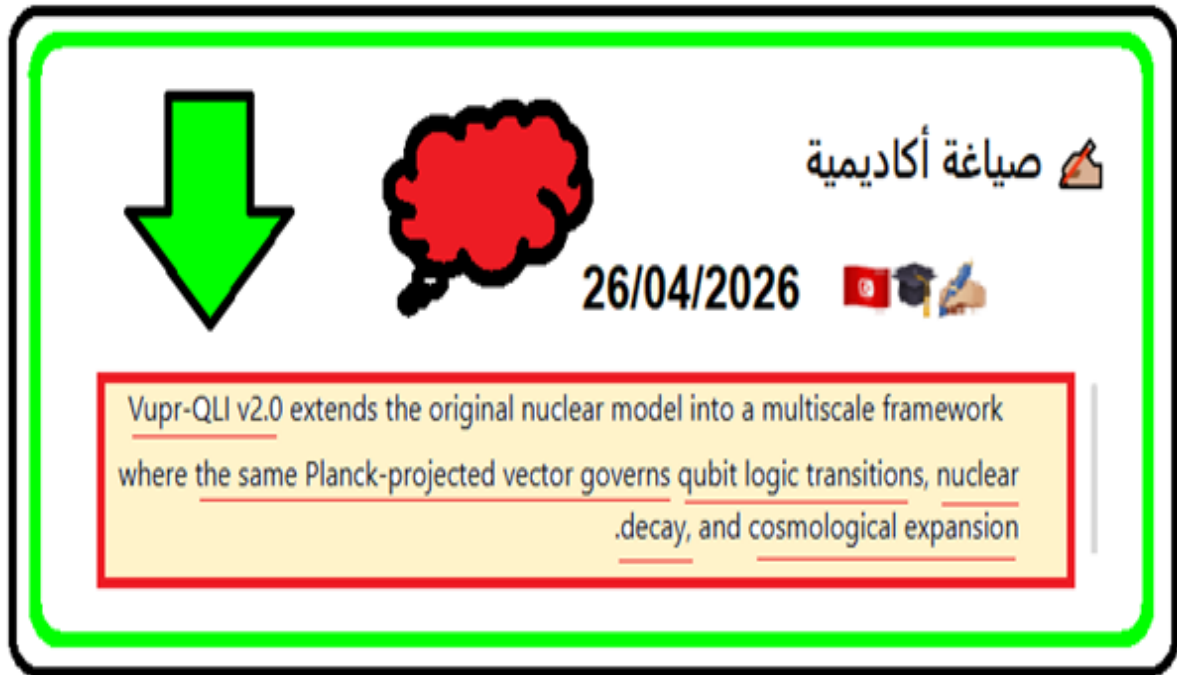

Vupr-QLI v2.0 étend le modèle nucléaire original dans un cadre multi-échelle où le même vecteur projeté sur l'équation de Planck régit :

*** Les transitions logiques des qubits,**

*** La désintégration nucléaire et**

*** L'expansion cosmologique.**

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 📢🌍

Academic formulation

Vupr-QLI v2.0 extends the original nuclear model into a multiscale framework where the same Planck-projected vector governs qubit logic transitions, nuclear decay, and cosmological expansion.

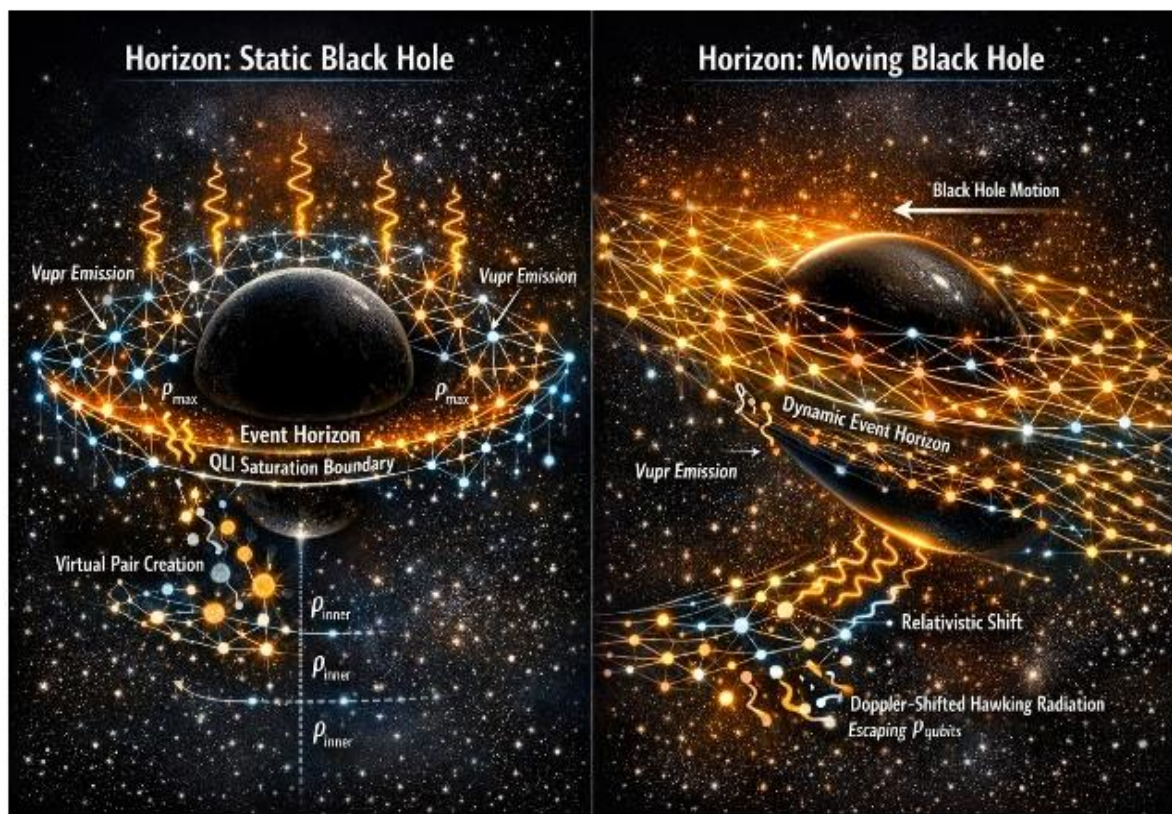

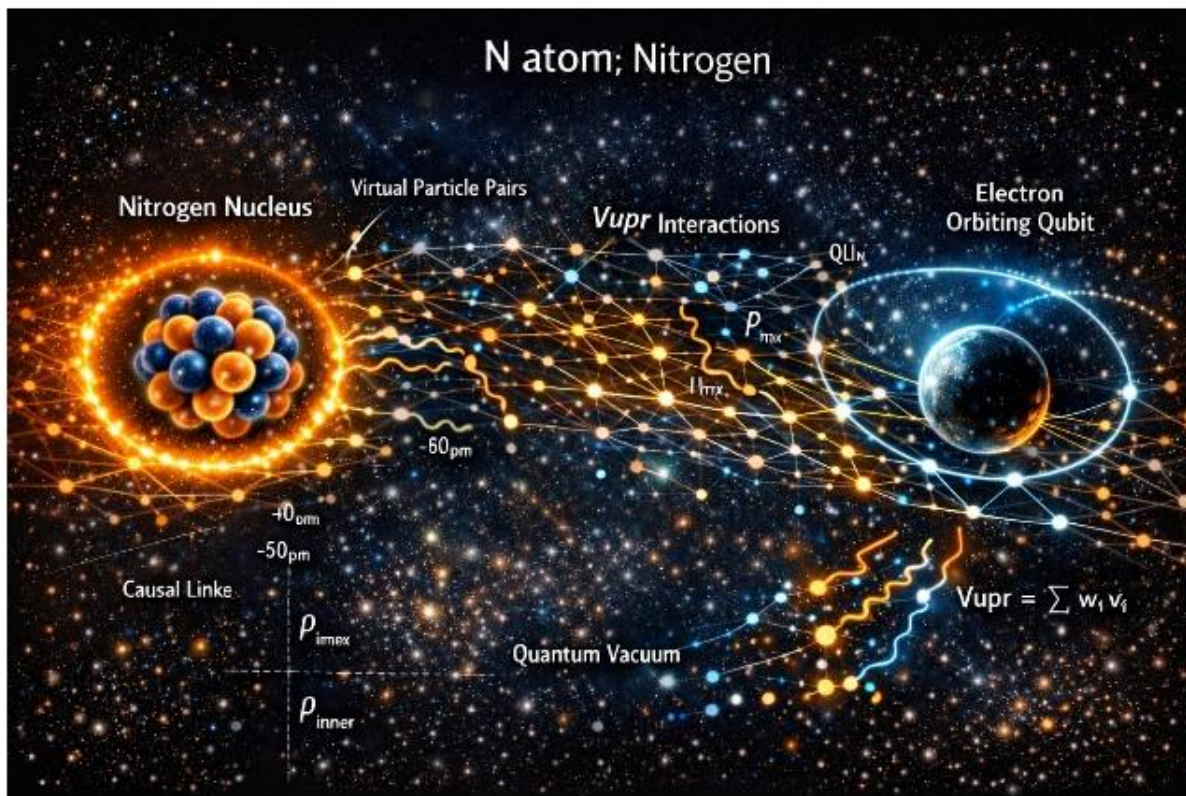

1) The basic idea of the Vupr model

We assume that:

The vacuum is not static, but has an active quantum structure (Quantum Vacuum Processing Rate = Vupr).

This rate generates an "update rate" for the volume of the universe, meaning that the expansion is a result of the internal dynamics of the vacuum.

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 🗣️🌍

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 🗣️🌍

The Equation of the Expansion of the Universe

Syber Secrity System Piloted by Vupr-QLI Trughfull Framework Version V3.0

https://chatgpt.com/s/t_69f9953ce3108191ab0e7e4db5ed580c

The Vupr-QLI cybersecurity model defines system integrity as a balance between coherence (normal traffic patterns) and instability (anomalous behavior). By mapping these quantities into a complex state vector, anomaly detection becomes a geometric and dynamical problem in Vupr space.

FromVersion 1.0 , 2.0, Version 2.1, and Version 3.0

This allowed us to move from version 1.0 (nuclear model only) to (

Version 2.0 (dynamic quantum-cosmological model + real-world application in the field of cybersecurity ..

*) Currently, by moving to Version 3.0, I am pleased to see the application areas expanded, we describes in chapter :

6.1 Nuclear physics

6.2 Cosmology

6.3 Materials Science

6.4 Cybersecurity

The Vupr-QLI cybersecurity model defines system integrity as a balance between coherence (normal traffic patterns) and instability (anomalous behavior). By mapping these quantities into a complex state vector, anomaly detection becomes a geometric and dynamical problem in Vupr space.

The Vupr-QLI framework provides a new geometric and dynamical interpretation of cybersecurity systems, enabling efficient anomaly detection through coherence–instability dynamics.

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 🗣️🌍

Comparison with Existing Methods

Method	Limitation
Signature-based	Cannot detect unknown attacks
ML models	Require training data
Vupr-QLI	Global, adaptive, model-free

Important note

In the section : Quantum-inspired Sandbox Model

Each detected incoherent **QLI** is mapped to a qubit-like degree of freedom .
Considering both behavioral and logical deviations,each anomaly contributes two

In the name of God, the Most Gracious, the Most Merciful. Praise be to God, Lord of the Worlds, and prayers and peace be upon our master Muhammad and his family and companions ,among the prophets and messengers 📢🌍

degrees of freedom. Therefore, the local configuration space of potential attack states grows exponentially as :

$$\bullet / \backslash \Omega(t) / = 2^{\{2n(t)\}} \bullet$$

This formulation captures the combinatorial explosion of attack pathways and provides a principled justification for exponential risk amplification . Thus, since the planck's space is never a vacuum but field of informations QLI Coherences, thus each incoherent QLI will be detected qubit by qubit .

Conclusion

We proposed a new cybersecurity paradigm based on coherence dynamics in QLI networks. The Universal Cybersecurity Law provides a unifying principle for detecting anomalies and attacks. Future work includes real-world deployment and integration with AI-based systems.

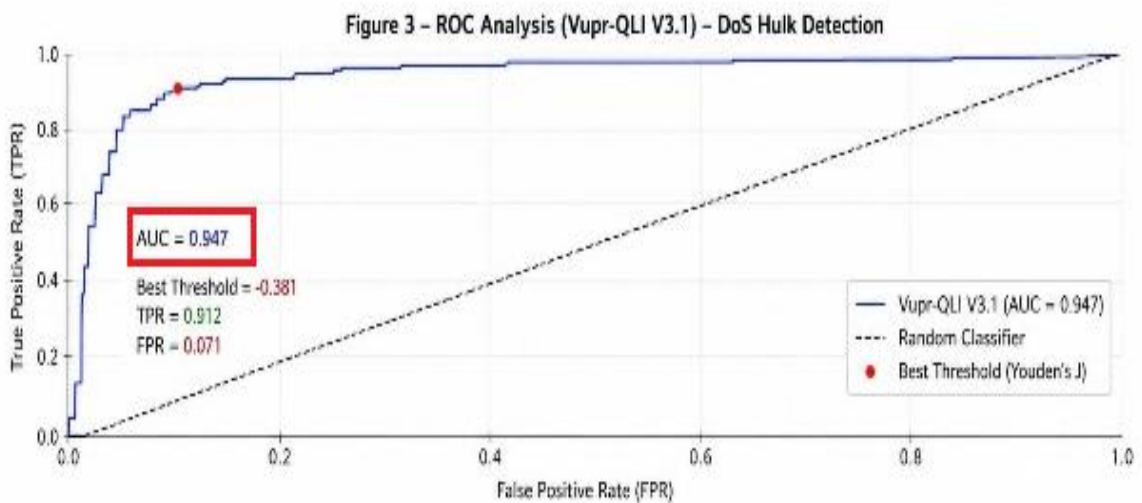

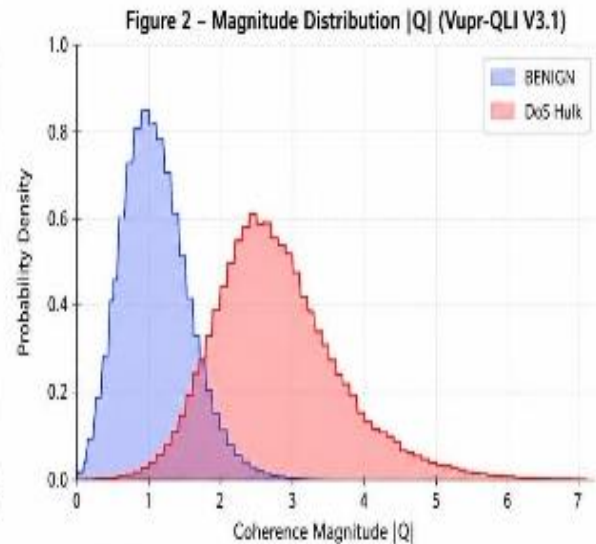

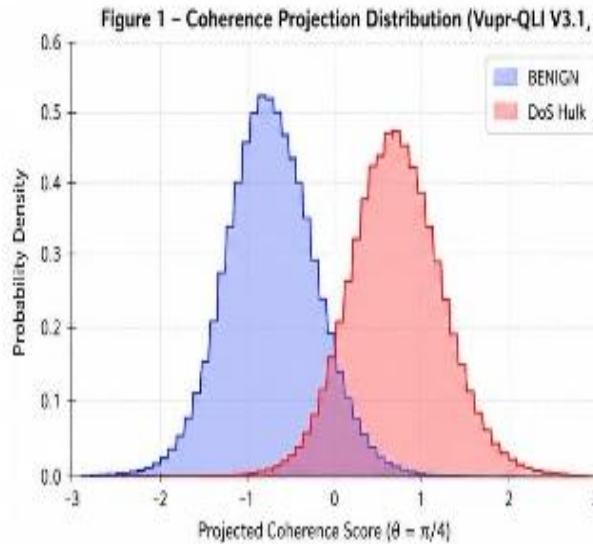

In the section : Quantum-inspired Sandbox Model

Each detected incoherent QLI is mapped to a qubit-like degree of freedom . Considering both behavioral and logical deviations, each anomaly contributes two degrees of freedom. Therefore, the local configuration space of potential attack states grows exponentially as :

$$\bullet / \backslash \Omega(t) / = 2^{\{2n(t)\}} \bullet$$

This formulation captures the combinatorial explosion of attack pathways and provides a principled justification for exponential risk amplification . Thus, since the planck's space is never a vacuum but field of informations QLI Coherences, thus each incoherent QLI will be detected qubit by qubit .
